

Date: Nov. 28, 2025

Attendees: Everyone

### **Discussing post-POC demo plans**

- Going over design document and V&V.
- No meetings during exams, but yes meeting on 19th of December
  - Treating everything from here until January 9th as one single large sprint
- We need to complete more states on Figma

### **3 GROUPS OF WORK**

- ML STUFF
  - James & Geon
- DATABASE & API STUFF
  - Norman & Kenneth
- FRONTEND STUFF
  - Tania & Elite & Ish

Created a bunch of tickets in JIRA for each subteam to start working on their parts:

- Set a priority for each subteam on things to get done
- ML stuff => Card detection stuff, migrate from OpenCV since it doesn't work as well
- DB & API stuff => Start making them
- Frontend stuff => Start with User Journey Flow Diagram to determine which screens & states we are missing

Set expectations: Progress by Dec 19th, More progress by Jan 9th at least something to show

No expectation of anything to be done by Jan 9th, but would be very nice if that is the case
