

Date: Nov. 7, 2025

Attendees: everyone

Card Detection and Classification

Card Classification (Geon)

- Explore different metrics (top-N accuracy for same pokemon but different card).
- Retrain with new API data.
- Constrain input to assume correct orientation and explore using only one hash method to reduce total hash sizes.

Card Detection (James)

- Now able to detect cards on the front-end!

UI

Profile Page (Ishpreet)

- Functional page for profile page, wish list, and trade list.
- Showcase to display up to 3 cards.
- Edit profile page.

Scanning Page (Tania)

- Got the manual edit inputs done (item name, set, tags)
- Will continue with the Camera opening part

Collection Page (Elite)

- No updates, will work on this the upcoming week

Navbar UI (Kenneth)

- No updates, will work on this the upcoming week

Outstanding JIRA tickets due Nov 14th.

Discuss POC script next meeting.

Database stuff (Norman)

- DB Schema Creation
- Conversation about how the schema may look like for the User related tables and Card related tables
