Date: Nov. 14, 2025
Attendees: everyone but Geon(?)

Meeting with Professor Mehdi:
- Add pictures to enhance presentation, show examples of Pokémon cards
- Add a context page before Goals?
- Reduce the amount of text in the slides since it is too cluttered
- Change the terminology (don't use normalize but something else)
- Not everything that is mentioned in the expectations slide needs to be a slide in our video, just mentioning it is fine
- I know this sucks but i think we technically need to change twitter to X (naur) (No we're not changing this screw elon)
- If we can, add some diversity so it is not the same card over and over
- Our video shows a good progress, talk more about the OpenCV if we have time and the social aspect if we have time again
- Make sure the video is visually appealing
- WE CAN DO AN INFOMERCIAL AS LONG AS WE HIT ALL THE IMPORTANT POINTS EXPECTED

Topic
Tania:
- Worked on the editing pages
- Camera feature to be implemented, aiming for Monday?
Norman:
- Create documentation, markdown, add to README to set up local database
- Add how to seed card data to local database
Kenneth:
- Added map parsing
- Worked on mobile/web UI
Geon:
- Pushed card data jsons with hash and metadata
- Working on implementing hashing for POC
James:
- Working on POC video
- Everyone coordinate with James to see acting/roles for POC video
Ish:
- No updates
Elite:
- No updates
